## PROFESSIONAL SUMMARY

Generative AI Engineer experienced in building production-grade voice agents, multi-agent LLM systems, retrieval-augmented generation pipelines, and full-stack AI SaaS products. Delivered multilingual real-time voice pipelines with sub-1-second latency across 20+ language variants and built secure applications using FastAPI, LangGraph, LangChain, Next.js, PostgreSQL, Docker, AWS, and GCP. Strong foundation in transformer fine-tuning, NLP, computer vision, and production API architecture.

## PROFESSIONAL EXPERIENCE

**Voxabeat** | *Hyderabad, India*

*Nov 2025 – June 2026*

**Generative AI Engineer**

- Architected and deployed production-grade multilingual AI voice agents using LiveKit, Deepgram, OpenAI, and Cartesia, maintaining sub-1-second latency across 20+ language variants.
- Built and shipped inbound and outbound voice-agent pipelines on AWS and GCP, integrating MongoDB, SIP telephony, and real-time sentiment analysis for live client deployments.

**Intelligence Academy** | *Dhaka, Bangladesh*

*May 2025 – Oct 2025*

**Research Assistant**

- Conducted systematic literature reviews on machine-learning applications, screening 1,048+ articles across Scopus and IEEE databases to synthesize state-of-the-art methods and research gaps.
- Designed NLP and computer-vision pipelines, fine-tuning DeBERTa-v3 and BERT models and benchmarking YOLO and Mask R-CNN architectures, achieving up to 99% accuracy on research datasets.

## PROJECTS

**Supportly** - *AI Customer Support SaaS and Agent Copilot* | [Live](#)

Next.js 16 | React 19 | TypeScript | FastAPI | PostgreSQL | Supabase | Docker

- Built a full-stack, multi-tenant support platform spanning customer, agent, and administrator workflows, with API-level RBAC, JWT access and refresh tokens, and tenant-scoped repository queries.
- Developed knowledge-grounded AI chat and an agent Copilot for suggested replies, ticket summaries, and contextual KB retrieval; implemented citation metadata, semantic search with pgvector, and least-loaded agent assignment.
- Validated the backend with 66 passing pytest tests and verified a strict TypeScript production build across 16 frontend routes, including health checks, request tracing, standardized errors, and graceful Redis degradation.

**TravelSphere AI** - *Multi-Agent Travel Planning Platform* | [Live](#)

FastAPI | LangGraph | LangChain | Groq | PostgreSQL | Tavily | AviationStack | Jinja2

- Developed a coordinated four-agent LangGraph workflow for flight discovery, hotel research, itinerary generation, and final-response formatting from natural-language travel requests.
- Integrated AviationStack flight data, Tavily-powered hotel research, Groq LLM generation, persistent PostgreSQL conversation state, a FastAPI API, and a lightweight responsive web interface.

**LunarkChat** - *Multi-Model Agentic AI Workspace* | [Live](#)

FastAPI | LangGraph | LangChain | Gemini | OpenAI | ChromaDB | SQLite | Tavily | Docker | AWS

- Engineered a multi-model AI workspace with five selectable Gemini and OpenAI models, real-time Server-Sent Events streaming, persistent conversation history, and thread-scoped long-term memory.
- Implemented RAG across PDF, DOCX, TXT, Markdown, Python, and CSV files using Google embeddings and ChromaDB, with Tavily web search for current-information requests.
- Containerized the application and created a GitHub Actions workflow that builds to Amazon ECR and deploys to EC2; enforced server-side API-key isolation and persistent local data stores.

## TECHNICAL SKILLS

- **Generative AI & LLMs:** Agentic AI, LangGraph, LangChain, RAG, prompt engineering, tool use, semantic search, embeddings, ChromaDB, pgvector, Hugging Face Transformers, voice AI
- **Programming and Frameworks:** Python, TypeScript, SQL, FastAPI, Next.js, React, Pydantic, SQLAlchemy, Pandas, NumPy, scikit-learn, PyTorch, TensorFlow, Flask
- **ML, NLP and Computer Vision:** Supervised and unsupervised learning, transformers, transfer learning, DeBERTa, BERT, YOLO, Mask R-CNN, U-Net, ResNet, EfficientNet, model evaluation
- **Cloud, Data and MLOps:** Docker, GitHub Actions, CI/CD, AWS ECR/EC2, GCP, Azure ML, PostgreSQL, Supabase, Redis, MongoDB, MLflow, Weights & Biases, Git, Linux
- **Analytics and Visualization:** Jupyter Notebook, Streamlit, Plotly, Tableau, Power BI, Matplotlib

## CERTIFICATES

- **Data Scientist Career Track**  
365 Data Science *Jan 2025 – July 2025*
- **Machine Learning Specialist**  
Codecademy *Nov 2024 – June 2025*
- **AI Engineer Career Track**  
365 Data Science *Dec 2024 – July 2025*

## EDUCATION

**B.Sc. in Textile Engineering** *Jan 2018 – Dec 2023*  
Bangladesh University of Textiles | Dhaka, Bangladesh
